

Information, projects, actions, examples of "good practice", places of culture and knowledge in the Terre di Siena, accessible to everyone.

The website www.turismopertutti.terresiena.it aims to be a tool for those who, despite permanent or even just temporary disability, want to visit the Terre di Siena, but also intends to go beyond the signalling of accessible places, services and projects aimed at the disabled.

Terre di Siena per Tutti is just the first step towards promoting and disseminating an authentic culture of universal accessibility, which reviews the planning of urban spaces, improving them along with the environment, tourism businesses, places of culture, accommodation and socialisation, so that they can be used by everyone: both residents and guests.
